## REISSUE APPLICATION DECLARATION BY THE INVENTOR

Docket Number (Optional)

125120

I hereby declare that:

Each inventor's residence, mailing address and citizenship are stated below next to their name.

I believe the inventors named below to be the original and first inventor(s) of the subject matter which is described and claimed in patent number 6,366,323, granted April 2, 2002 and for which a reissue patent is sought on the invention entitled Digital Camera with Moveable Image Pickup Device

the specification of which

☐ is attached hereto.☒ was filed on April 1, 2004 as reissue application number 10/815,193  
and was amended on April 28, 2005, September 6, 2005 and May 19, 2006  
(if applicable)

I have reviewed and understand the contents of the above-identified specification, including the claims, as amended by any amendment referred to above.

I acknowledge the duty to disclose information which is material to patentability as defined in 37 CFR 1.56.

☒ I hereby claim foreign priority benefits under 35 U.S.C. 119(a)-(d) or (f), or 365(b). Attached is form PTO/SB/02B (or equivalent) listing the foreign applications.

I verily believe the original patent to be wholly or partly inoperative or invalid, for the reasons described below. (Check all boxes that apply.)

☐ by reason of a defective specification or drawing.☒ by reason of the patentee claiming more or less than he had the right to claim in the patent.☐ by reason of other errors.

At least one error upon which reissue is based is described below. If the reissue is a broadening reissue, such must be stated with an explanation as to the nature of the broadening:

I believe the U.S. Letters Patent 6,366,323 to be partly inoperative or invalid by reason of the patentee claiming less than patentee had a right to claim in the patent. Specifically, patent claims 1-13 only recite apparatus claims that include an "image pick-up device," which patentees believe to be too narrow. Patentees have elected to broaden the limitation "image pick-up device" by providing method claims which use broader limitations "optical element" or "imaging element." In this regard, patent claims 1-13 contain an error in that they do not include method claim limitations which recite, for example, a method of operating a camera including, *inter alia*, positioning all of the optical elements or imaging elements along the optical axis when the barrel is in all of the plurality of photographic positions (emphasis added), which is shown, *inter alia*, in Fig. 1A of U.S. Letters Patent 6,366,323. Therefore, method claims 14-31 correct the errors of original apparatus patent claims 1-13, by reciting a method of operating a camera comprising, *inter alia*, (with respect to independent method claim 14) positioning all of the optical elements along the optical axis when the barrel is in all of the plurality of photographic positions, and (with respect to independent method claim 23) positioning all of the imaging elements along the optical axis when the barrel is in all of the plurality of photographic positions (emphasis added).

## WARNING:

Petitioner/applicant is cautioned to avoid submitting personal information in documents filed in a patent application that may contribute to identity theft. Personal information such as social security numbers, bank account numbers, or credit card numbers (other than a check or credit card authorization form PTO-2038 submitted for payment purposes) is never required by the USPTO to support a petition or an application. If this type of personal information is included in documents submitted to the USPTO, petitioners/applicants should consider redacting such personal information from the documents before submitting them to the USPTO. Petitioner/applicant is advised that the record of a patent application is available to the public after publication of the application (unless a non-publication request in compliance with 37 CFR 1.213(a) is made in the application) or issuance of a patent. Furthermore, the record from an abandoned application may also be available to the public if the application is referenced in a published application or an issued patent (see 37 CFR 1.14). Checks and credit card authorization forms PTO-2038 submitted for payment purposes are not retained in the application file and therefore are not publicly available.

I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine and imprisonment, or both, under 18 U.S.C. 1001, and that such willful false statements may jeopardize the validity of the application, any patent issuing thereon, or any patent to which this declaration is directed.
